

## QUALITY AND ENVIRONMENTAL POLICY

The activities of Kelteks d.o.o. are aimed at delivering added value in the production of fiberglass products while promoting environmental, economic and social responsibility and keeping the customer in focus.

The policy of the company and all employees is aimed at ensuring complete customer satisfaction by adapting to their needs, meeting all requirements and expectations while maintaining mutual trust.

In order to increase competitiveness, we are working on continuous improvement of the quality of existing products and services through our own innovations and by introducing new knowledge and technologies into production processes.

All employees regularly receive training and professional development in accordance with the needs of the production process and system. We ensure the safety of our employees by providing necessary protective equipment to maintain the safest possible working conditions.

The company also focuses on using proper equipment and technologies and builds partnerships with customers and suppliers in order to continuously improve, prevent pollution and optimize the use of resources. Our responsibility for resource management begins as early as the production process, product and business planning.

Kelteks d.o.o. undertakes to carry out all activities that have an impact on the environment in accordance with legal regulations and other requirements.

All business activities of the company focus on environmental protection and raising environmental awareness and the level of protection among our employees. By separating and collecting recyclable waste, we reduce the amount of waste disposed of in landfills. The company actively participates in environmental protection by continuously preventing negative impact on the environment of both production and final products and services.

The company management provides all necessary resources for the system to function properly and periodically checks and reviews the functionality of the quality and environmental protection system.
